

The two pie charts illustrate the proportion of **six types of** Chinese Time-Consumption on Mobile Media Daily Time Spent in March 2016 **and** 2018.

Overall, in the past two years, the combination of Social Networking and Video has accounted for approximately 70% of the total. Although after the transition of entertainment time from 2.0B to 3.2B Hours, the proportion of other types in China is not high, and the data has hardly changed.

But Reading, Audio, and Game methods remain low respectively. The News method shows some improvement, with the Video method showing the most improvement, reaching 22%.
